**Blue Uniform Bellflower**  
*Campanula carpatica 'Blue Uniform'*

Height: 8 inches

Spread: 14 inches

Sunlight:

Hardiness Zone: 3a

Other Names: Carpathian Harebell, Carpathian Bellflower

**Description:**

Adorable, compact mound, covered with lavender-blue cups; perfect in rock, scree and wall gardens, a butterfly magnet; prefers consistent moisture, but not wet soil

**Ornamental Features**

Blue Uniform Bellflower is bathed in stunning lavender bell-shaped flowers at the ends of the stems from mid summer to late fall. Its round leaves remain emerald green in color throughout the season. The fruit is not ornamentally significant.

**Landscape Attributes**

Blue Uniform Bellflower is a dense herbaceous perennial with a mounded form. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting butterflies to your yard. It has no significant negative characteristics.

Blue Uniform Bellflower is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Container Planting

### Planting & Growing

Blue Uniform Bellflower will grow to be about 8 inches tall at maturity, with a spread of 14 inches. Its foliage tends to remain low and dense right to the ground. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 5 years.

This plant does best in full sun to partial shade. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. Consider applying a thick mulch around the root zone over the growing season to conserve soil moisture. This is a selected variety of a species not originally from North America.

Blue Uniform Bellflower is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our store for more information on how to protect it over the winter months.
